Software Engineering & Project Management (SEPM)

Energy & Utility Management System (EUMS)

Billing, metering and customer service for electricity, water and gas

UML Diagrams

Software process model: Waterfall · Combined SEPM + DBMS course project

Group number	Group __
Course and section	Software Engineering & Project Management (SEPM), Section __
Supervisor / instructor	Prof. _____
Institute	_____ Institute of Technology
Date	October 2026

#	Name	Registration number
1	Sumit P Surendran	20243590
2	Sreethan Reddy	20243550
3	Sushrut Lad	20243551
4	Viswajith	20243559

1. UML Diagrams

1.1 Sequence diagram – meter reading to bill to payment

This is the main end-to-end flow and the one shown in the demo video.

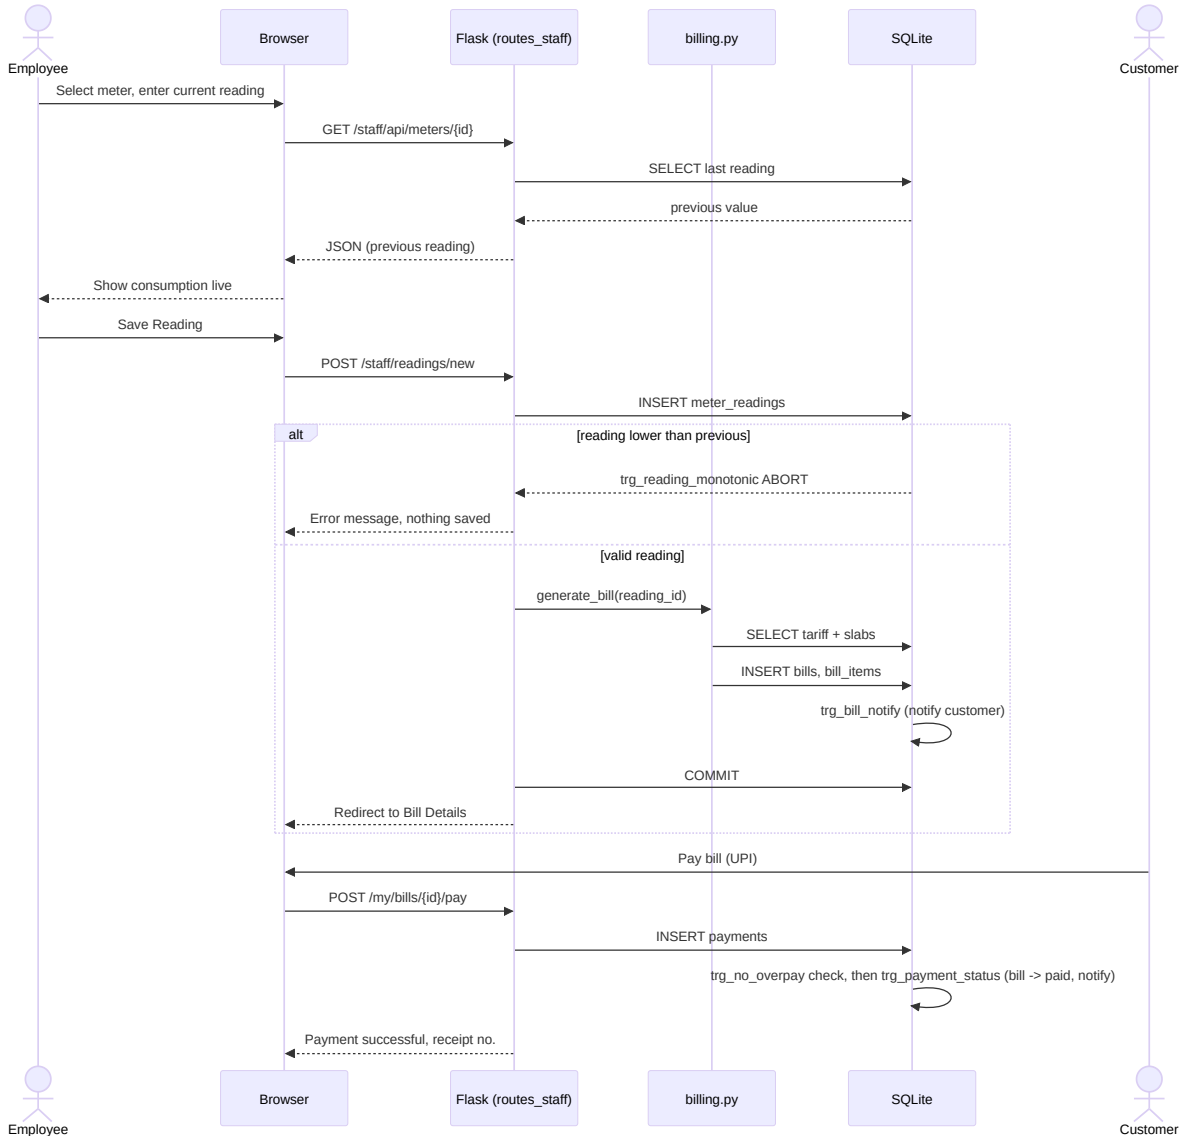

Figure 1: Sequence diagram: record reading, generate bill, pay bill

1.2 Activity diagram – online bill payment

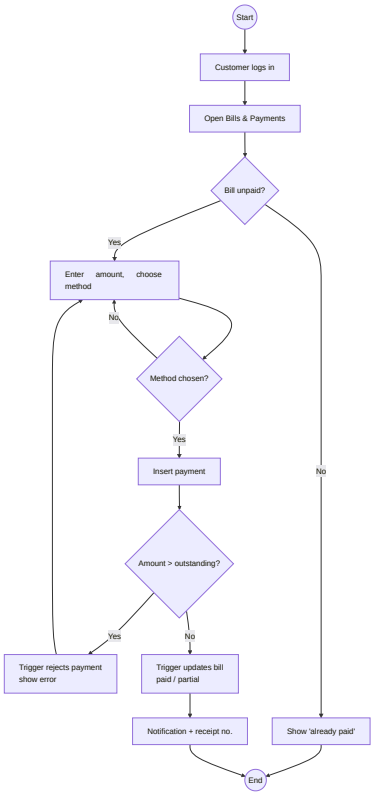

Figure 2: Activity diagram for paying a bill

1.3 Class diagram (domain model)

The application is written in a procedural Flask style, so these classes are the *domain model*: each class is a database table, and the operations are carried out by route functions and `billing.py`.

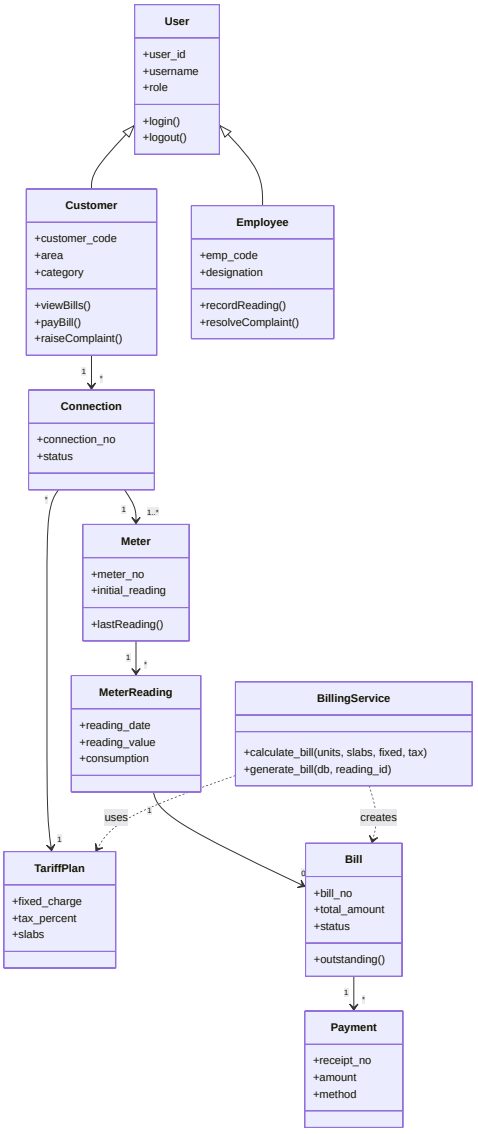

Figure 3: Class diagram of the main domain entities
